Brittany May

Solutions Architect · Workflows, Automation, Data & AI

Atlanta, GA · 404-723-6084 · brittanyhmay@gmail.com · linkedin.com/in/brittany-h-may · alittle.agency

Summary

I build the workflows, automations, and systems that make work easier for everyone involved, and I meet people where they are. Sometimes that includes AI and sometimes it doesn't. For 15+ years I've done this for universities, an SBA lender, nonprofits, and political campaigns. Today I manage data for political ad and advocacy programs at Van Ness Creative Strategies, evaluate AI models for a leading AI lab, and run my own practice. I'm as comfortable in the details with developers as I am giving leaders the plain version.

What I bring

Workflows that fit people
Map how work really happens, then fix it with the tools a team already has.

Automation and integration
Connect CRMs, HR, finance, donor, and campaign systems so data flows on its own.

Built to hold up
Compliance-ready workflows with audit trails (FERPA, HIPAA, SOX, SBA).

AI, when it helps
Find where AI saves real time, and say so plainly when a simpler fix works better.

Experience

A Little Agency
Jan 2026 – Present · Atlanta, GA

Founder & Solutions Architect

- Design workflows, automations, data systems, and AI tools for small businesses, nonprofits, and public-sector teams.
- Built and shipped AI products with Claude, including Case Closed (legal case management), SpoonStack (energy planning), and Cascade Care (care team coordination).
- Build working tools for economic development programs: AI opportunity reviews, resource matching, event follow-up, and impact dashboards.

Mercor (contract)
Sep 2025 – Present · Remote

AI Training Data Expert, Data Architecture

- Selected as a domain expert to create and evaluate AI training data for a leading AI lab.
- Design multi-step data architecture and governance tasks that test how AI models handle real enterprise work.
- Grade model output against expert rubrics and write detailed technical feedback.

Van Ness Creative Strategies
Oct 2025 – Present · Remote

Data Technology Manager

- Manage data for political ad, fundraising, and advocacy programs as the sole data expert across six platforms (ActionKit, Mailchimp, NGP, ActBlue, Switchboard, Action Network).
- Design data flows and Looker Studio and MySQL reporting, and build Zapier and Frakture automations that cut manual work.

7(a) Funding Group
Dec 2019 – Dec 2025 · Atlanta, GA

Director of Enterprise Data & Automation

- Owned data architecture across Salesforce, Salesmate, and Pipedrive for a regulated SBA loan portfolio.
- Connected document collection, version control, and audit trails into one process that met SBA requirements.
- Cut manual data entry by 40% and sped approvals by 35% with standardized workflows and automation.
- Prototyped AI workflows with ChatGPT and Claude to speed onboarding and reduce errors.

University of Michigan Dec 2015 – Dec 2019 · Ann Arbor, MI

Lead Data Architect

- Architect and product owner for the enterprise data warehouse and master data program across HR, Finance, and Student Records (100M+ records, 15+ departments).
- Built matching, deduplication, and stewardship from scratch; data integrity improved 30%.
- Led 80+ automation projects and set data standards across departments.

University of Michigan Sept 2009 – Dec 2015 · Ann Arbor, MI

HRIS Manager

- Owned HR systems strategy across PeopleSoft, FileMaker, and payroll.
- Built one onboarding flow linking HR, payroll, and IT access, removing paper for hundreds of new hires a year.

Skills & Tools

AI tools: Claude, Claude Code, ChatGPT, Gemini; model evaluation, rubric design, AI workflow design

Automation & integration: Zapier, Frakture, APIs, ETL/ELT, and Looker Studio

Data: Data architecture, master data, governance, Salesforce, PeopleSoft, MySQL, Azure SQL, Oracle

Compliance: FERPA, HIPAA, SOX, SBA/federal; audit trails

Build: Python, Git, HTML/CSS, Jupyter (working knowledge)

Education

B.A. Psychology, University of Michigan, 2010
